Jim Breakell Tahiti talk at Dive Show, Oct 12/13 2002

In September Jim Breakell of Scuba Safaris is going on a fact finding trip to the Pacific.

First off he's going to Ryrutu for for a few days humpback whale watching, then a week on the inaugural trip of the Tahiti Aggressor and then on to Bora Bora (what a hard life he has!)

When he gets back he will be giving an illustrated talk about his trip at the Dive Show in Birmingham on October 12/13th 2002.

For more information contact Scuba Safaris, PO Box 8, Edenbridge, Kent TN8 7ZS. Tel 01342 851196.

Ocean Optics

The System That Fits in Your Pocket. Not empties it.

Digital photography is a breakthrough for underwater snapshooters.

With user friendly automatic features not found on underwater film cameras like autofocus and autoexposure, they are incredibly easy to shoot. LCD monitor screens let you see the image as it really is without the parallax problems associated with budget underwater cameras. Zoom optics that focus down to a few centimetres let you dispense with the hassles and costs of additional supplementary lenses. Instant playback helps you learn as you go and you'll never even have to pay for another roll of film!

Now you can choose from no fewer than 13 different Olympus digital cameras to take underwater.

You can be up and running with a camera and housing for under £410.

Read all about digital in Issue 1 of **Underwater Photography** magazine www.uwpmag.co.uk

The future of underwater imaging is here. Where it's always been. At Ocean Optics.
